Tiberiu Popa

Schnurstrasse 35,
61231 Bad Nauheim, Germany

To whom it may concern,

The purpose of this letter is to serve as a referral for Mircea-Silviu Itu in the field of custom web application development using PHP, MySQL, Twitter Bootstrap and Yii Framework, <http://www.yiiframework.com/> and to confirm his participation alongside project manager Michael Kling and the Ascendro team.

The aforementioned project is a Product Release Management System for the US branch of a major Smartphone manufacturing company the naming of which is prohibited by the Non-Disclosure Agreement signed by all involved parties for a minimum period of 2 years.

Mircea's tasks over the 4 months of development involved custom server-side scripting in OOP PHP (Yii MVC), MySQL Query Building, working with a large and complex relational database and integrating the application with Testrail API <http://www.gurock.com/testrail/>, working with a complex AJAX structure, building frontend views and displaying data in various formats including PDF document generation and various other tasks.

Mircea is very friendly and open. He is a good communicator, knows his abilities and is not afraid to say if there are requests he is unsure about or things are not clear to him. Being a natural learner and always searching for new solutions and technologies Mircea was able to get into the already existing system, learn the usage of new API's and fulfill our requirements successfully.

Mircea-Silviu Itu

Michael Kling

Tiberiu Popa

A handwritten signature in blue ink, appearing to read "Mircea-Silviu Itu".
